

Product – Gamma Glutamyl Aminopeptidase

Code - CK1265

Pack size – 28 tests (tablets in tubes)

Price per pack - £24 68 (excluding VAT & carriage)

Storage - 4⁰C

Shelf Life - 6 months guaranteed, usually in excess of 12months

CE marked

Health & Safety – Each tablet contains L-gamma glutamyl-p-nitroanilide. This component in its pure state may be hazardous if inhaled, ingested or absorbed. The amount used in the tablet does not present a hazard when used as directed.

Additional Reagent – whilst no additional reagent is required, the optional addition of 1 drop of Spot Indole (CK9053) will confirm a positive reaction i.e. the yellow colour seen with a positive will give a strong blue/purple colour.
